Held: 18th Oct. 2014 | 12pm-2pm | HHS 111

This workshop will serve as an introduction to 3D scanning as it relates to architecture design, analysis and speculation via kinect + 3D scanning software. It will cover how to generate 3D scans, how to refine / edit 3D results and how to output for various applications - fabrication, modeling, analysis, post production or other.

Software:
Rhino + Artec Studio
Hardware:
Microsoft Kinect
